

Homemade Food Website Overview

Website Name: Homemade Delights

Purpose: To showcase and promote high-quality, freshly prepared homemade food.

Website Features and Pages

1. Home Page

Hero Section:

Display the logo, tagline (e.g., "Bringing Comfort and Flavor to Your Plate"), and a brief introduction.

Dynamic greeting text using JavaScript that changes based on the time of day.

Warm and inviting layout with earthy tones (e.g., brown and pastel colors) for the background.

Navigation Bar:

Links to About Us, Menu, Gallery, and Contact Us pages.

Responsive and easy to use on all devices.

2. About Us Page

A section highlighting your story and passion for homemade food.

Include images of your food preparation process or workspace.
CSS-styled text and images to create a visually balanced layout.

3. Menu Page

Display food items in card format:

Name, short description, and photo for each dish.

Attractive hover effects on each card for interactivity.

Clean grid layout for ease of browsing.

4. Gallery Page

A photo showcase of your dishes.

Responsive grid design.

Lightbox functionality for zooming into images when clicked.

5. Contact Us Page

Contact Form:

Fields for name, email, phone, and a message.

Submit button styled with hover effects.

Embedded map to show your location.

Optionally, a direct email link or phone number.

Design Choices

1.Color Scheme:

Use warm, earthy colors for the main layout (brown for headers and buttons, beige for the background).

Soft pastel tones for accents, making the site feel cozy and welcoming.

2.Font Style:

Professional, clean fonts like Arial and sans-serif for readability.

Interactive Elements:

JavaScript for a dynamic greeting, interactive menu hover effects, and search functionality.

3.Responsive Design:

Mobile and desktop-**friendly** layouts.
